An Episode of the Rocky Point Outing.
Of all the tales told as to the fortunes and misfortunes of the Men's class of the Methodist church on their trip to Rocky Point, one has just become known. A reporter (not for The Bulletin) was invited to take the trip, and it is said conducted himself in a most creditable manner until on his return. As the autotruck neared his home he thought he would show the crowd how gracefully he could alight when the car was moving. By the means, he disported himself all over the road in a series of acrobatic feats which were nothing short of wonderful. He was left sitting in a dazed condition in the middle of the street.

After the "day after" (which many know about) the gentleman missed his glasses. A thorough search about the house failed to reveal the lost articles. He thought him of the "night before" (which many have experienced) and hid him to the places where he came in contact with Mother Earth and there he discovered the glasses, smashed to smithereens—probably the result of being sat on with undue energy.

Armour Millions Thrown Into the Breach
Chicago Board of Trade Able to Maintain Record of Never Closing.

Chicago, July 31.—Armour's millions today rescued the wheat trade from panic. Instead of chaos resulting from a settlement day in the midst of a war market, with possibly scores of firms embarrassed and a virtual certainty that bankruptcies would ensue, the Chicago board of trade was enabled to maintain its record of never having closed, no matter how great the emergency.

Tonight not a single failure had taken place. The chief reason was that 75 entangled firms and individuals on "change" were freely given today by Armour and Company whatever the necessities of the situation required.

President George E. Marcy of the Armour Grain company, was the man who tried to occasion little quietude circulated word on the floor of the board, partly in person and partly through his lieutenants, that any member in trouble need only come to him. Before nightfall Armour & Co. had taken over 8,000,000 bushels of open trades, which might not have been critically in danger of not being safely settled in due contract time on the expiration of business hours at the end of the month.

Ardmore, Okla., reported a temperature of 110 degrees.
